

## John Parsons ( - 10 Feb 1930)

---

*The Washington Post, June 15, 1909, p. B6*

### **Parsons Building Home**

#### **Contractor Erecting Handsome Residence for Own Use in Northeast**

Work is being rapidly pushed on the house which John L. Parsons is erecting for his own use at 1012 Massachusetts avenue northeast. The house is of colonial type, three stories in height, of rough red brick, with Indiana limestone trimmings.

On the first floor there will be a parlor, reception hall, dining room, and kitchen. The second and third floors each contain three bedrooms and a bath. These rooms will be finished in white enamel.
